SPRING FLOWERING
BULBS FROM HOLLAND

WEST COAST
AMERICAN BULBS

1949

SELECTED AND OFFERED

BY

JAMES W. SPRING, JR.

Herringbrook Farm

277 COUNTRY WAY

SCITUATE CENTRE, MASS.

TERMS:—

Net cash 30 days.

To responsible parties goods will be shipped on open account of \$5.00 or more, but delivery charges are not paid in this event. Orders of \$5.00 or more when accompanied by cash, I pay delivery charges.

On Orders under \$5.00 shipped parcel-post, charges are prepaid and added to your invoice. As this averages about 20c, why not include it when ordering?

On all orders received before July 25th you may deduct 15%. No Discount on West Coast Bulbs.

AVAILABILITY:—

All orders are accepted subject to availability and crop failure.

The right to substitute items of equal or greater value is reserved unless otherwise notified. While I try to select the best stock offered, I can give no warranty, expressed or implied, as to its productiveness.

James W. Spring, Junior.

GENERAL INSTRUCTIONS:—

1. Buy nothing but the very best quality bulbs.
2. Unpack bulbs immediately upon arrival, and before planting keep in a dry cool place for a few days. Avoid draughts as bulbs are very sensitive to same.
3. When growing inside, do not use soil in which bulbs have been grown before.
4. Avoid the use of fresh manure, also new pots or pans. Be sure to provide sufficient drainage.
5. Bone-meal is the best and safest fertilizer. Work a little into the soil around the bulb, but do not let it come into contact with the bulb.
6. Do not cut off foliage close to ground when picking bloom. Leave at least two leaves, preferably more, so that the bulb may ripen properly. When foliage has "yellowed" is the proper time to remove it.
7. Do not plant crocus, scilla, etc., where the lawn will be mowed in early spring.

BOTANICAL TULIPS (Genus Tulipa)ERIOSTEMONESSection 1. Australes (Sensu Lato)Subsidiary Species:

1. T. AUSTRALIS (S.S.) - April 15 - 3 - .70; 12 - 2.35; 25 - 4.35
Habitat: Mediterranean Coastal Districts, Portugal to Greece.
"The Yellow Tulip of Bologna." Sweet scented, urn-shaped flower opening wide in sunshine. Petals yellow within, outer segments yellow, flushed red.
 2. T. CELSIANA (T. Persica; T. Breyniana) - May 15 - 3 - .65; 12 - 2.15; 25 - 4.00
Habitat: South of Spain, Morocco, Atlas Mts.
A late flowering dwarf variation of T. Australis. It forms a bright starry carpet for the Rock Garden. Rugged constitution.
 5. T. PRIMULINA - May 10 - each .70; 3 - 1.90; 12 - 7.15
Habitat: Aures Mts. 6,000., East Algeria.
One to two scented flowers on short stalk, erect, opening in afternoon. Color within creamy white, tipped purple, yellow at base. Good species for garden as it multiplies rapidly in warm situation.
 6. T. UREMIENSIS - April 25 - each 1.00; 6 - 5.70; 12 - 11.00
Habitat: North-west Persia.
Habit dwarf; flower erect, urn-shaped, outer segments olive and red; inner segments clear yellow. Opens flat in sunshine. Considered rare.
 7. T. SILVESTRIS (Florentina Odorata; T. Gallica) - April 15 - 6 - .70; 12 - 1.25; 25 - 2.45
Habitat: Western Europe.
One of the earliest tulips to be identified in Europe. It is markedly stoloniferous and in favorable locations will spread rapidly. Very sweetly scented. Tall and graceful with bright yellow flowers opening wide in sun.
- T. Hageri (S.L.)
Subsidiary Species:
8. T. HAGERI (s.s.) - May 1 - 3 - 1.00; 12 - 3.60; 25 - 6.50
Habitat: Greece, Smyrna.
Excellent garden flower bearing two to four copper-bronze flowers on single stem. Larger and brighter than T. Orphanidea.
 9. T. ORPHANIDEA - April 25 - each .90; 6 - 5.25
Habitat: Greece.
Dark green, purple edged leaves form rosette from which springs three to four copper-bronze flowers on single stem. Grows freely. Rare.
 10. T. WHITTALLII - April 25 - each 1.75
Habitat: Smyrna.
Fine garden plant. Backs of petals green and buff. Inner petals bright orange with olive basal blotch. Larger than Hageri and Orphanidea.

Section 2. Saxatiles (T. Humilis, S.J.)Subsidiary Species:

11. T. HUMILIS S.S. - March 25 - each .90; 3 - 2.50; 12 - 9.50
Habitat: Persia.
Flowers, one or two in number, on dwarf stem, are pale rose to lilac within, yellow base. This species wants a warm sheltered spot in garden.
12. T. PULCHELLA - March 30 - each .70; 3 - 1.90; 12 - 7.15
Habitat: Asia Minor.
Inner surfaces crimson to purple with deep basal blotch margined white. Flower forms a globular cup opening wide in sunshine. Habit dwarf.
13. T. VIOLACEA - March 25 - each .70; 3 - 1.90; 12 - 7.15
Habitat: North Persia.
Dwarf habit. Bud upright, fully colored as it emerges from the soil. Rich rosy purple with olive basal blotch margined in yellow.

The three above listed species are frequently confused as to nomenclature; they are probably a single species with the blooming dates and coloring differing because of climatic segregation.

14. T. AUCHERIANA - April 10 - each 2.00
 Habitat: Persia, Syria.
 A charming plant, one of the smallest tulips, growing and flowering freely, with wide open flowers, pinky brown in color.
- T. SAXATILIS s.l.
 Subsidiary Species:
16. T. CRETICA - April 10 - each 1.50; 3 - 4.20
 Habitat: Crete.
 The "Mt. Ida Tulip." One to three flowers per stem. Inner surfaces nearly white, tinged pink, outer segments purple and green on backs. It is quite hardy.
18. T. SAXATILIS, s.s. - April 25 - 3 - .65; 12 - 2.15; 25 - 4.00
 Habitat: Crete.
 "The Tulip of Cande" mentioned in 1606 by Clusius. One of the most beautiful species in cultivation. Flowers an exquisite combination of yellow and lilac. Leaves appear in December and are uninjured by frost. Likes dry, hot summer location. Because of stoloniferous habit it grows and multiplies freely.

Section 3. Biflores.

19. T. BIFLORA - March 25 - 6 - .55; 12 - .90; 25 - 1.80
 Habitat: South Russia.
 One of the smallest tulips known. One to five flowers per stem. Color, white within, yellow basal blotch. Good grower and does well in rock gardens.
20. T. TURKESTANICA - March 20 - 6 - .55; 12 - .90; 25 - 1.80
 Habitat: Turkestan.
 Very similar to Biflora, more free-growing and blooming. Five to nine blossoms per stem.
21. T. POLYCHROMA - March 25 - 3 - .80; 12 - 2.85; 25 - 5.25
 Habitat: Afghanistan.
 Color dead white, tinged pink. Unique in that this form never appears to have more than two leaves, opposite. Suggested for Alpine House as are all these early bloomers.
22. T. TARDA (. Dasystemon) - May 15 - 3 - .50; 12 - 1.60; 25 - 3.10
 Habitat: Eastern Turkestan.
 A branched, dwarf tulip, yellow with white tips. One of the most charming of rock garden tulips. Increases freely.

LEIOSTEMONES

Sub-section 1. CLUSIANAE

T. Aichisonii, s.l.

Subsidiary Species:

25. T. STELLATA - April 15 - each 1.25; 6 - 7.20; 12 - 14.00
 Habitat: Afghanistan.
 Single flower, inner petals white with yellow basal blotch; backs of petals cherry red. Excellent for rock garden.
26. T. STELLATA - CHRYSANTHA - April 15 - 6 - .55; 12 - .90; 25 - 1.80
 Habitat: Kurram Valley.
 Probably a color variant of T. Stellata. Brilliant yellow within, outside cherry red. Another fine rock garden variety. The bulbs are small, but potent.
28. T. CLUSIANA - April 15 - 3 - .65; 12 - 2.00; 25 - 3.75
 Habitat: Persia.
 The "Lady Tulip" of commerce. Much grown in the south of France as a "cut flower." Inside of flower white with purple blotch; backs of segments cherry.
- T. MONTANA s.l.
29. T. LINIFOLIA - May 20 - 3 - .70; 12 - 2.35; 25 - 4.35
 Habitat: Eastern Bukhara.
 Scarlet-vermilion of unrivalled intensity. Not large, but brilliant and graceful. One of the most beautiful of the species in cultivation.
30. T. MAXIMOWICZI - May 8 - 3 - .55; 12 - 1.80; 25 - 3.40
 Habitat: Bukhara.
 Differs slightly from T. Linifolia in blooming date; otherwise very similar.

31. T. BATALINI - May 20 - 3 - .80; 12 - 2.85; 25 - 5.25
Habitat: Bukhara.
 Considered an Albino form of T. Linifolia. Sweetly scented buff yellow blossom.
32. T. MONTANA (Wilsonii) - April 20- each .85; 6 - 4.60; 12 - 8.90
Habitat: Tabriz.
 Similar to T. Linifolia but decidedly larger. Intense crimson scarlet within. A fussy grower which does well in a hot, dry, summer location.

Sub-section 2. GESNERIANA S.L.

Under this section come all garden varieties, Cottage, Darwin, Breeders, etc. Here also are included several varieties generally sold as Botanicals; strictly speaking, they are not.

T. Acuminata (Cornuta Stenopetala) - May 1 - 3 - .65; 12 - 2.15; 25 - 4.00
Habitat: ?
 The Horned Tulip. Long contorted petals of red and yellow make this a fantastic cut flower as well as an excellent rock garden variety.

T. Marjoletti - May 15 - 3 - .50; 12 - 1.60; 25 - 3.10
Habitat: Morocco.
 Soft primrose yellow within; flushed red on backs of segments. Good cut flower. Either rock garden or bedding plant.

34. T. SUAVEOLENS (Schrenki) - 6 - .80; 12 - 1.25; 25 - 2.45
Habitat: Armenia.
 This species has vivid red petals with yellow streaks. Scented. Stem erect. A persistant bloomer.

Sub-section 3. OCULIS-SOLIS S.L.

40. T. OCULIS-SOLIS s.s. - April 10 - 6 - .80; 12 - 1.25; 25 - 2.45
Habitat: Provence, Bologna.
 "The Red Tulip of Bologna." Of interest botanically as representative of this particular group. Not too good a garden flower as it is not a good grower and its colors are somewhat dull. Scarlet, with yellow and black basal blotch.
47. T. PRAECOX - April 25 - 6 - .80; 12 - 1.25; 25 - 2.45
Habitat: Northern Italy.
 Well worth growing in the garden. Increases freely. Striking large flower of intense scarlet with black and yellow center. Stoloniiferous.
50. T. KUSHKENSIS - April 20 - each 2.00; 12 - 20.00
Habitat: Turkestan.
 Stem about 17 cm. long. Inner surface a brilliant blood red with yellow margin. Magnificent, but needs ideal conditions. Rare.
51. T. LANATA - April 15 - each 2.00; 12 - 20.00
Habitat: North-west Persia.
 One of the very finest and most brilliant tulips. Quite hardy. Tall stem bearing immense flower of brilliant scarlet with broad yellow margin.
52. T. HOOGIANA - May 15 - each 2.50; 12 - 25.00
Habitat: Central Asia.
Very rare. Immense flower on tall stem, bright scarlet inside and out; olive and yellow basal blotch. Requires warm location.

Sub-section 4. EICHLERES, s.l.

55. T. EICHLERI - April 10 - 6 - .80; 12 - 1.25; 25 - 2.45
Habitat: Central Asia.
 Unrivalled in the brilliance of its coloring. A vivid, glossy scarlet, black and yellow center. One of the very best for garden cultivation.
56. T. INGENS - April 15 - each 1.90; 3 - 5.50
Habitat: Central Asia.
 A truly handsome flower whose outer segments of buff are relieved by glossy scarlet, black center.
57. T. TUBERGENIANA each 2.50
Habitat: Samarkand.
 Very similar to Lanata and Fosteriana which are first rate garden plants; although brilliant, it is less vigorous. Being available, I list it.

58. T. FOSTERIANA - April 10 - 3 - .60; 12 - 2.00; 25 - 3.70
Habitat: Samarkand Mts.
 One of the more brilliant of the tulip species. Excellent garden flower appearing year after year. Glossy scarlet with black and yellow basal blotch.
- v. RED EMPEROR - April 10 - 12 - 1.50; 100 - 10.00
 Selected variety of T. Fosteriana. Well deserves its increasing popularity. I offer TOP-SIZE bulbs from which blooms of 9 - 10 inches across may be expected.
60. T. GREIGI - April 25 - each 2.25
Habitat: Turkestan.
 A magnificent garden flower distinguished by its interesting leaves, mottled brown and purple, as well as by its large orange scarlet flowers with black centers.
61. T. KAUFMANNIANA - March 25 - 12 - 1.30; 100 - 9.50
Habitat: Turkestan.
 The "Water-lily Tulip." One of the finest. There are many variations and hybridizations of this species now offered. It is entirely hardy and prolific. Ground color of petals white to primrose, backs splashed with crimson, yellow center.
- v. K. Coccinea Orange scarlet each .70; 3 - 1.90; 12 - 7.15
 v. K. Elliott Red on cream 6 - .80; 12 - 1.25; 25 - 2.45
 v. K. Gaiety White within, red outside 6 - .80; 12 - 1.25; 25 - 2.45
 v. K. Primrose Primrose yellow 6 - .80; 12 - 1.25; 25 - 2.45
62. T. PRAESTANS - April 15 - 6 - .85; 12 - 1.45; 25 - 2.75
Habitat: Central Asia.
 Another fine species. Bears two to four pale scarlet flowers on erect stem.
- v. PRAESTANS-FUSELIER - April 15 - 12 - 1.50; 100 - 10.00
 A selected stock of the above variety. Three to five flowers on single stem. Brilliant orange scarlet bringing wonderful spot of color to rock garden. Bud emerges through soil in full color.
- Sub-section 5. KOLPAKOWSKYANA
62. T. KOLPAKOWSKYANA - April 15 - 3 - .65; 12 - 2.00; 25 - 3.75
Habitat: Eastern Turkestan.
 Pure bright yellow petals. Flower opens very flat with petals curving back until entire blossom seems inverted. Don't let the name scare you! It is a fine variety and does well in most gardens.
68. T. OSTROWSKYANA - April 25 - 3 - .65; 12 - 2.00; 25 - 3.75
Habitat: Eastern Turkestan.
 A most attractive medium sized tulip. A vigorous grower. Blossom is orange-red bearing gracefully recurved petals on slender stem.
- SOLITARY SPECIES
72. T. SPRENGERI - May 25 - each .70; 3 - 1.90; 12 - 7.15
Habitat: Asia Minor.
 The flowers are long, pointed, bright crimson in color. Likes light shade under shrubs. Advisable to plant as soon as delivered. Once established, it does well.
- * BEGINNER'S COLLECTION OF BOTANICAL TULIPS \$ 9.50
 One dozen each of the following seven varieties:
 Kaufmanniana Acumintat
 Silvestris Eichleri
 Praestans-fusilier Clusiana
 Fosteriana, v. Red Emperor
- * ADVANCED COLLECTION OF BOTANICAL TULIPS \$ 13.50
 One dozen each of the following nine varieties:
 Biflora Kolpakowskyana
 Tarda Praecox
 Marjoletti Linifolia
 Ostrowskyana Saxatilis
 Celsiana (Persica)
- * NO ADDITIONAL DISCOUNT.

CROCUS (Spring Flowering)GIANT FLOWERING

No garden is quite complete without the lovely, inexpensive crocus. As soon as milder weather comes, usually in mid-March, the crocuses appear. Planted about 4 inches deep in well loosened soil during September and October, they will multiply and thrive for many years to come. If planted in the lawn, do not mow grass until the crocus foliage has died down.

		<u>Top Size</u>
PURPUREA GRANDIFLORA	purple, large flower	
REMEMBRANCE	dark blue, silver tinted	
SIR WALTER SCOTT	white, striped lavender	
STRIPED BEAUTY	striped lavender	12 - .55
SNOWSTORM	large flowered white	
YELLOW MAMMOTH	golden yellow	100 - 4.00
ATTRACTIVE MIXTURE OF ALL COLORS FOR NATURALIZING		100 - 2.75; 1,000 - 20.00

CROCUS SPECIES

Crocus species flower exceptionally early, producing beautiful dainty flowers. Both the flowers and the bulbs are smaller than the large flowering varieties.

BIFLORUS SCOTCH	white, striped lavender	12 - .50; 100 - 3.25
CHRYSANTHUS E.A. Bowles	yellow, tinted brown	12 - .55; 100 - 3.75
CHRYSANTHUS E.P. Bowles	dark yellow, feathered brown	12 - .55; 100 - 3.75
CHRYSANTHUS Canary Bird	orange-yellow	12 - .55; 100 - 3.75
CHRYSANTHUS Snow Bunting	white, striped purple	12 - .55; 100 - 3.75
CHRYSANTHUS MIXTURE		12 - .55; 100 - 3.75

SUSIANUS (Cloth of Gold)	golden yellow	12 - .50; 100 - 3.25
--------------------------	---------------	----------------------

KOROLKOWI, from Turkestan, earliest yellow, bronze flush outside		12 - .55; 100 - 3.75
--	--	----------------------

SIEBERI, pale lilac, orange center. Charming in bowls or small boxes		12 - .55; 100 - 3.75
--	--	----------------------

TOMASINIANUS, pale, lavender-blue; amethyst within		12 - .55; 100 - 3.75
--	--	----------------------

CHIONODOXA (Glory of the Snow)

Attractive when planted in masses under light shrubbery; perfectly hardy, flowering soon after snowdrops.

GIGANTEA	light blue, large flower	12 - .35; 100 - 2.50
LUCILLIAE	lilac blue	12 - .35; 100 - 2.50
LUCILLIAE Alba	white	12 - .35; 100 - 2.50
LUCILLIAE Rosea	rose	12 - .65; 100 - 4.00

SARDENSIS, blooms two weeks earlier than above varieties. Bright blue		12 - .35; 100 - 2.50
---	--	----------------------

FRITILLARIA Imperialis (Crown Imperial) orange-red		12 - 5.50; each .50
--	--	---------------------

Produce large flowers that consist of trusses of bell-shaped blooms. As they grow 3 - 5 feet tall, it is best to have them in a sheltered place. Bloom early May.

FRITILLARIA Meleagris (Guinea-hen flower)		12 - .40; 100 - 2.50
Dainty drooping bell-shaped flowers of white and purple appear in early spring		

FRITILLARIA Meleagris Alba white - plant 6 inches deep		12 - .40; 100 - 2.50
FRITILLARIA Meleagris Purple King - purple - plant 6" deep		12 - .40; 100 - 2.50

SEE NATIVE AMERICAN BULB SECTION for further varieties of Fritillaria.

GALANTHUS (Snowdrops)

Nivalis Simplex, single - white with green edge		12 - .60; 100 - 4.50
Nivalis Plenus, double - white with green edge		12 - .60; 100 - 4.50

MUSCARI (Grape Hyacinths)

These small conical shaped blooms of bright blue add just the right touch when planted with Golden Harvest Daffodils.

MUSCARI ARMENIACUM - deep cobalt blue; large flowers		12 - .35; 100 - 2.50
MUSCARI BOTRYOIDUS COERULEA - clear light blue - choice		12 - .50; 100 - 3.25
MUSCARI BOTRYOIDUS Alba - white		12 - .50; 100 - 3.25
MUSCARI PLUMOSUM (Feather Hyacinths) - large violet, plume shaped flowers on short stems. Bloom in May		12 - .50; 100 - 3.25

SCILLA

Scilla Campanulata (Wood Hyacinth)		
Blue, white, pink; mixed; late blooming	12 - .40;	100 - 3.00
Scilla Sibirica; sky blue; early	12 - .45;	100 - 3.25
Scilla Sibirica Spring Beauty; taller and larger than Sibirica Blue. Not suitable for naturalizing as is other. Good rockery plant.	12 - .75;	100 - 4.50
Scilla Sibirica Alba; white	12 - .45;	100 - 3.25

HYACINTHS

HYACINTHS, the most sweet-scented of bulbous flowers, give a beautiful and long lasting display of colors in early spring. Plant six inches deep in rockery, beds or borders. HYACINTHS are also excellent for blooming indoors after they have been buried in the garden, or kept slightly moist in cold cellar for ten weeks.

LARGE SIZE - This size is recommended for Display purposes and for Forcing to bring into the house later on.

Ostara	Yale blue)	
Bismark	Delicate light blue)	
King of the Blues	Indigo blue)	
La Victoire	Bright carmine red)	3 - .75; 12 - 2.75
L'Innocence	White)	
Myosotis	Light blue)	
Pink Pearl	Lovely rose pink)	
Queen of the Pinks	Deep rose)	

BEDDING HYACINTHS - These medium sized bulbs are recommended for use in larger groups and for bedding.

L'Innocence	White)	
Yellow Hammer	Yellow)	
Balfour	Heliotrope violet)	
Ostara	Deep blue)	12 - 2.00; 25 - 3.75
Marconi	Deep pink)	
Bismark	Light blue)	
Lady Derby	Light pink)	

GARDEN TULIPS

It is not only impossible but impractical to list all of the garden tulips that are obtainable from Holland - so, I present some of the best and most popular varieties including some of the newer introductions.

If there are any varieties which you should desire that you do not find listed here, please let me know before JULY 15th and I will be glad to import them for you. Special orders cannot be handled after JULY 15th.

<u>SINGLE EARLY</u>		<u>doz.</u>	<u>100</u>
Couleur Cardinal	deep glowing scarlet	1.30	9.50
Sunburst	yellow flushed red	1.30	9.50
General de Wet	yellow shot with copper	1.10	7.80
Ibis	deep rose	1.10	7.80
PRINCE CARNIVAL	yellow, feathered red	1.30	9.50
Olympiade	golden yellow	1.10	7.80
White Hawk	white	1.10	7.80

<u>DOUBLE EARLY</u>			
Dante	deep blood red	1.30	9.50
Mr. van der Hoeff	brilliant yellow	1.30	9.50
Peachblossom	dark pink	1.30	9.50
Snowball	white	1.30	9.50
ORANGE NASSAU	coppery red	1.30	9.50

DARWIN TULIPS

ARISTOCRAT	soft violet-rose - EXCELLENT	1.50	10.00
BLANCA	white	1.50	10.00
BLUE PERFECTION	clear, light violet	1.50	10.00
Charles Needham	vermillion scarlet	1.30	9.50

DARWIN TULIPS cont'd

		<u>doz.</u>	<u>100</u>
Campfire	beautiful red	1.00	7.50
DEMETER	Early purple; large flower	1.50	10.00
Cordell Hull	red, feathered white	1.10	8.00
GOLDEN AGE	golden yellow, flushed salmon	1.10	8.00
QUEEN OF THE NIGHT	Improved "Tulipe Noire" - deep violet maroon	1.50	10.00
Niphetos	sulphur yellow	1.10	8.00
NEW ORLEANS	pansy-purple; superb	1.50	10.00
Pride of Zwanenburg	beautiful light rose	1.50	10.00
Prin. Elizabeth	lilac-rose	1.10	8.00
SCARLET SENSATION	bright scarlet; improved "City of Haarlem"	1.50	10.00
Yellow Giant	tall stem., golden yellow	1.00	8.00

COTTAGE TULIPS

Advance	orange-scarlet; very large	1.10	8.00
G.W. Leak	brilliant geranium red	1.10	8.00
Golden Harvest	soft yellow	1.10	8.00
Inga Hume	red, broad yellow edge	1.10	8.00
MARSHALL HAIG	brilliant scarlet; EXCELLENT	1.30	9.50
Ossi Oswald	cream white growing pinker as it opens	1.10	8.00
Pres. Hoover	screaming orange scarlet	1.10	8.00
ZOMERSCHOON	clear salmon pink, feathered; one of the oldest and best!	1.30	9.50

LILY-FLOWERED TULIPS

Alaska	sweet-scented yellow	1.25	9.00
CAP'T FRYATT	reddish violet	1.25	9.00
MILDRED	rosy pink	1.25	9.00
White Duchess	white	1.25	9.00

TRIUMPH TULIPS

Alberio	cherry red, edged yellow	1.00	7.50
BANDOENG	mahogany red, flushed orange, yellow edge	1.00	7.50
ELMUS	carmine-red, edged white	1.00	7.50
RED GIANT	dazzling red	1.00	7.50

BREEDER TULIPS

BARODA	glossy chestnut brown	1.30	9.50
Dillenberg	orange, edged apricot	1.10	8.00
George Grappe	mauve, overlaid bronze	1.30	9.50
INDIAN CHIEF	reddish mahogany, flushed violet	1.30	9.50

DOUBLE LATE TULIPS

BONANZA	carmine-red, edged yellow	1.30	9.50
Eros	old rose	1.10	8.00
Mt. Tacoma	white	1.50	11.00
SYMPHONIA	carmine-red; double sport of "Pride of Haarlem"	1.50	11.00

PARROT TULIPS

Blue Parrot	bluish-heliotrope	1.30	9.50
Fantasy	salmon pink, green edges	1.50	11.00
Orange Favorite	orange with green blotches	1.50	11.00

PRAECOX VIRIDIFOLIA

This tulip has a green and buff flower reminding one strongly of a green orchid. It is unusual and lovely. When grown with the deep red-violet of Cap't Fryatt (or made into a flower arrangement) it makes a UNIQUE combination.

There are many newer introductions which I don't list; there are many older tulips which I don't list; I can't handle them all!! I can, however, and will import any varieties which you might desire at market prices.

KING ALFRED	Still the finest yellow trumpet daffodil; vigorous grower; excellent in every way			1.50	12.00
REMBRANDT	Larger flowering yellow trumpet			1.90	14.00
SPRING GLORY	White perianth, yellow trumpet			1.50	12.00
ROXANE	Pure white daffodil; fringed trumpet			1.90	14.00

<u>POETAZ NARCISSUS</u>					
Cheerfulness	Double poetaz, white perianth white double center white and yellow; 4 - 5 flowers per stem			1.30	9.50
Inglescombe	All yellow throughout, full double center			1.90	14.00
GERANIUM	Perianth pure white; orange-red eye			1.45	10.00
SCARLET GEM	Deep golden yellow; bright red eye			1.45	10.00

<u>INCOMPARABILIS</u>					
MONIQUE	White perianth, widely expanded yellow cup edged orange			2.20	16.00
SCARLET ELEGANCE	Deep yellow perianth, cup deep orange-red			1.90	14.00
Carlton	Sulphur yellow; large yellow cup			1.90	14.00
LA RIANTE	White perianth, deep red cup			1.90	14.00
SEMPER AVANTI	A large noble flower with creamy white overlapping perianth, the enormous cup is deep orange throughout.			1.90	14.00
<u>DOUBLE NARCISSUS</u>					
TWINK	A pleasing shaggy blossom; yellow with orange accents; an early forcer and early bloomer outside			1.45	10.00

MRS. WILLIAM COPELAND

A truly amazing double white daffodil whose large CAMELLIA-type blossom on a strong stem makes this a "must" for those who enjoy elegance in the spring garden. each - 1.00; 25 - 23.00

<u>POETICUS</u>					
ACTEA	Probably the most beautiful of the Poeticus varieties. A four inch perianth of softest white acts as a perfect foil for the striking eye, yellow, edged red. The old time "pheasant's eye" much improved. The largest POETICUS.			1.25	9.25

Mixtures of daffodils and narcissus for naturalizing. Price on application.

MINIATURE DAFFODILS - JONQUILS - NOVELTIES

MINIMUS

The smallest of all daffodils. The tiny yellow flower on a three inch stem is among the earliest flowers to bloom, generally around March 5th. Easily forced for those who want a novel potted plant. Selected bulbs, 12 - 1.80; 25 - 3.40

NANUS

Somewhat larger than Minimus. Trim yellow flower for rock gardens. 12 - 1.80; 100 - 13.00

BULBOCODIUM

Hoop-petticoat Narcissus. Narrow inconspicuous perianth and long, wide mouthed trumpet. Light yellow. Another gem for the rock garden. 12 - 1.45; 25 - 2.75

BULBOCODIUM CITRINIUS

Citron-yellow. Excellent companion to above. 12 - 1.80; 25 - 3.40

CANICULATUS

A delightful flower! Miniature of cluster-flowered (POETAZ) Narcissus. White perianth with golden cup bears freely on six inch stems.

12 - 1.45; 25 - 2.75

JUNCIFOLIUS

Baby jonquil four inches tall; Wide cup of yellow backed by spreading perianth.

12 - 2.00; 25 - 3.70

LOBULARIS

Trumpet daffodil; bicolor white perianth with yellow trumpet. Six inches.

12 - 2.00; 25 - 3.70

PALLIDUS PRAECOX

Very early flowering. Another miniature trumpet. Lemon yellow.

12 - 2.70; 25 - 4.75

JONQUILLA Trevithian

Perianth pale yellow, deep yellow cup; the best jonquilla variety. Two to four flowers per stem.

12 - 1.30; 100 - 9.50

ODORUS RUGULOSUS PLENUS

Double Campanille Jonquil. Two to three blossoms per stem; yellow; blossom strongly resembles a double Begonia.

12 - 1.45; 25 - 2.75

TRIANDRUS THALIA

A late blooming flower markedly different. Waxy white flowers, two to three per stem. Perianth recurves along stem, giving a tear drop appearance. Also known as Angel's Tears.

12 - 2.80; 100 - 19.50
